

AGROSEVILLA

OLIVES & OLIVE OIL

Product Catalogue

The world's leading olive co-operative

Agrosvilla was established in 1977 as a cooperative society. It is the largest olive producer, packer and exporter in the world, and one of the main olive oil exporters in Spain.

Incorporated as an organization of farming cooperative societies, **Agrosvilla** controls each stage of its Olives and Olive oil production: from trimming the trees and harvesting the olives to manufacturing, distributing and marketing the end product, thereby ensuring rigorous traceability and greater quality control.

Agrosvilla is currently made up of 13 cooperative societies and more than 4,500 associated olive-growers in Sevilla, in the heart of the largest olive production region in the world. It has an annual production of over 80,000 tons of olives exported to more than 75 countries all over the world.

Quality and certifications

Agrosvilla's commitment to quality and safety not only meets the requirements and expectations of the most exigent customers and consumers but as a farmer-owned company guarantees a responsible management of processes and practices to ensure sustainability and protect the environment.

Did you know?

- Between 4 and 5 kilos of olives are needed to produce 1 litre of olive oil.
- The tree's age only affects the quantity produced, not the quality.
- An olive tree starts to produce between the ages of 5 and 10, and its production starts to decline after it is 100 years old.
- An olive's colour does not depend on the variety but on how ripe it is.
- An oil's colour does not indicate quality.
- Olive oil has vitamins A, D, K and especially E.

Extra Virgin Olive Oil is obtained from the fruit of the Olive tree by physical means and only under conditions not leading to alterations in the oil. Natural and authentic, the best option for Olive oil lovers, best consumed raw to appreciate its aroma and flavour and to fully benefit from all its natural components.

Olive oil and Extra Light Olive oil both consist of a blend of refined Olive oil and Virgin Olive oils in different proportions. No kitchen alongside the Mediterranean lacks this essential ingredient, ideal for cooking! Our Extra Light is the perfect option for those who prefer a milder taste.

Olive Pomace Oil is the blend of refined Olive Pomace oil (obtained from crude olive pomace oil by refining methods that do not modify the original glyceridic structure) and Virgin Olive oil. One of our best options for all deep and shallow frying as its taste is very mild and will give excellent results!
