 **AGROSEVILLA**

Creating value through cooperation

Agrosvilla is one of the world's leading specialists in Mediterranean plant-based foods. Since 1977, the group has brought together more than 5,000 farmers and 14 Andalusian cooperatives to transform high-quality olive oil, olives and other vegetables into a wide range of premium products, commercialised in over 80 countries.

Its fully integrated vertical model –from the field to the consumer– ensures con-

trol, traceability and excellence at every stage of the production process.

Agrosvilla's offering includes table olives, olive oils and pickled vegetables, developed with different profiles, formats and market positionings to meet the specific needs of each market and channel. Industrial capability, reliability, innovation and deep consumer insight define a proposal designed to generate sustainable value and build long-term commercial relationships.

The world's leading olive co-operative

AgroSevilla is a global specialist in table olives, with deep expertise built around the cultivation, processing and commercialisation of one of the most iconic products of the Mediterranean diet. Since its foundation, the company has developed a fully integrated approach that allows direct control over the olive, from grove selection and harvesting to processing and final delivery.

This category focus is supported by advanced knowledge of olive varieties, preparations and formats,

enabling the development of a comprehensive and competitive range tailored to diverse market requirements. AgroSevilla combines industrial scale, operational efficiency and rigorous quality standards to ensure consistent product performance and supply reliability.

With a strong international footprint, the company continues to reinforce its leadership in table olives through a combination of origin expertise, process optimisation and a clear, market-driven approach.

Expert olive oil solutions, built to perform

Agrosevilla's olive oil line is rooted in its cooperative origins and its role as a producer, packer, and value-adder of oils produced by its member cooperatives.

Olive oil is part of Agrosevilla's agricultural DNA. Based on its in-depth knowledge of the product, the company has developed a broad range of oils, designed to meet market demands with robust, reliable solutions tailored to each client.

From everyday oils to more differentiated profiles, Agrosevilla structures its olive oil offering around a clear value proposition, combining sensory differentiation, packaging versatility and operational reliability. By aligning origin, processing and market insight, the company delivers flexible solutions across product types and formats, supported by strong production capacity, rigorous process control and long-term industrial expertise.

Unique strengths

Integrated control & full traceability

Continuous monitoring from the reception of oil from partner cooperatives to the final packaged product, ensuring consistency and reliability in every batch.

Quality & food safety

Strict physico-chemical and sensory controls, supported by accredited in-house and external laboratories, in line with the most demanding market standards.

Regulatory compliance & international certifications

Certified facilities and processes that ensure full compliance with regulatory and commercial requirements across key international markets.

Reliable production and supply

Structured production capacity

Industrial organisation designed to handle significant volumes, optimising planning, storage, and packaging.

Flexible, controlled packaging

Dedicated processes for filtration, filling, sealing, weight control, and foreign body detection, adapted to each format and material.

Long-term reliability

A cooperative model combined with industrial scale and export experience ensures consistent supply and stability for private label projects.

Virgin Olive Oil

Functionality, flavor and tradition. A category geared towards everyday use, valued for its natural character and culinary versatility.

Olive Oil

Versatility for everyday use. A suitable solution for applications where thermal stability and a mild sensory profile are prioritized.

Extra Light Olive Oil

Sensory neutrality and adaptability. Especially suitable for technical preparations and applications where the oil should not interfere with the final flavor.

Olive Pomace Oil

Performance and efficiency for intensive use. Designed for the food service and industrial sectors, it stands out for its stability at high temperatures and frying efficiency.

Pickled and preserved vegetables

Agrosevilla's pickled and canned vegetable line draws on more than 50 years of experience, combining production traditions, technical expertise, and a strong market focus.

A robust and flexible industrial structure provides great adaptability to different product approaches, allowing us to work with various recipes, flavor profiles, and raw material selections, as well as a wide variety of formats, sizes, and types of packaging. This versatility enables us to provide ideal solutions for needs across

multiple channels, flavors, and consumption occasions, always adhering to strict food safety and product consistency standards.

The portfolio ranges from classic snacks to vegetable mixes and ready-to-eat salads, with offerings designed to provide functionality, consistency, and industrial reliability. All of this is developed with a responsible approach, incorporating recyclable packaging, certified materials, and sustainable management aligned with Agrosegilla's cooperative model.
